

# RECOMMENDATION ON ISO 20022 CUSTOMER REPORTING OF NPC CREDIT TRANSFERS (NCT<sub>s</sub>) AND NPC INSTANT CREDIT TRANSFERS (NCT INST<sub>s</sub>)

NPC004-01 / 2020 Version 1.1 / Date issued: 30 April 2021 / Date effective: 30 April 2021

**Public**

## Abstract

This document sets out the recommended rules for customer reporting, implementing of the 2020 NPC Credit Transfer Scheme Rulebook and of the 2021 NPC Instant Credit Transfer based on version 2009 of the Interbank Credit Transfer ISO 20022 XML message standards.

## 0 Document Information

### 0.1 Change History

Issue number	Dated	Reason for revision
2020 v0.9	2020-03-03	First NPC draft of Recommendation of customer reporting
2020 v0.991	2020-03-06	NPC draft reviewed by NCT & NCT Inst WG
2020 v0.992	2020-03-11	Final draft sent to SMC for decision
2020 v1.0	2020-03-27	Decided by NPC Scheme Management Committee (SMC) 26 Mars 2020
2020 v1.1	2021-04-30	Updates suggested by NCT & NCT Inst WG and decided by Scheme Management Committee (SMC) 13 April 2021. Layout update, removal of IG versions and change in section 3.1 and 3.2 in AT-11 and AT-25.

## 1 Background

The NPC issues implementation guidelines that are based on the ISO 20022 standard for the customer-to-bank (C2B) space as well as the interbank space. The recommendations on ISO 20022 bank-to-customer (B2C) account information represent the third and final link in the chain, as requested by stakeholders.

It should however be noted that the development of B2C implementation guidelines is not seen as a viable option in view of the following barriers:

- Statements need to report on both NPC and non-NPC payments (i.e. different rules apply).
- Statements need to report on non-payment transactions such as securities and trade finance.
- No European Standard on the use of Bank Transaction Codes.
- A level of complexity required which is currently not recognised in the NPC rulebooks. The rulebooks only refer to the bank reporting to the receiving party (and not to the bank reporting back to the instructing party). Moreover, there are a number of different transactions tied to a NPC payment, the so-called R-transactions, for example the return of a credit transfer or inquiries on NCT transactions. These R-transactions are not part of the messages and elements reported.

It is therefore agreed that a mapping exercise as described in the below introduction section presents a helpful alternative.

## 2 Introduction

### 2.1 Aim of the document

The aim of this document is to present a mapping of the rulebook requirements vis-à-vis the 'Transaction Details' message elements of the ISO 20022 reporting messages. In terms of reporting to the receiving party, i.e. the beneficiary of a credit transfer (NCT or NCT Inst) and the B2C account information as described in the relevant dataset in the rulebooks is in fact a minimum. Moreover, it appears that, for matters of good common understanding, the B2C dataset as reported in the rulebooks is not always sufficient. In order to propose a more extensive view of the B2C possibilities, the present document relies on the interbank information received by the bank of the recipient.

At the current stage, this document does still deal only with the information provided by the bank of the recipient to the recipient of the payment. The B2C information for the sender, i.e. the originator of the credit transfer (NCT or NCT Inst) is not covered. Nor are the R-transactions, the inquiry processes or reporting of currency exchanges taken into account. Note: This document provides a mapping of DS-02/DS-04 attributes towards possible ISO 20022 elements notwithstanding that legal requirements or banking usage rules may prevent the information to be passed on to the payment recipient.

Consequently, this document takes into consideration:

- At NPC level:
  - DS-02 of the NCT Rulebook 2020 v1.0 and NCT Instant Rulebook 2021 v1.0, The interbank payment dataset
- At ISO level the following reporting messages:
  - Camt.052.001.02 BankToCustomerAccountReportV02
  - Camt.053.001.02 BankToCustomerStatementV02
  - Camt.054.001.02 BankToCustomerDebitCreditNotificationV02

This document does not provide guidance for other reporting situations than those mentioned above.

## 2.2 Content of the document

For the NCT and NCT Inst schemes on one side, this document proposes:

- A table of the dataset (DS) attributes and the corresponding elements in the relevant camt messages.
- An abstract of the camt messages populated with the DS attributes.

Being a mapping exercise, this document does not provide any usage rules. Most of the DS attributes fit into the “transaction details” section of the “entry/entry details” level in all 3 camt messages. Some of them can or must be used at a higher level. Depending on whether they batch entries on the account, or depending on their agreements with their customers, banks may use ‘higher’ levels elements of the message in order to reflect the DS Attributes.

In this document, only the relevant elements to accommodate the DS attributes are displayed. When an element reflecting a DS attribute contains several sub-elements, the latter are not displayed; They must be populated in the camt messages as they are in the relevant pacs message.

Banks may also report on more information than the content of the DSs and as a consequence use additional elements to those described in this document.

### 3 NCT

#### 3.1 NCT DS-02 attributes and the corresponding elements in the “TransactionDetails” section of the relevant camt messages.

The description below applies when the customer (i.e. beneficiary) wishes to receive the detailed information of a transaction under “Entry Details”. Depending on the agreement between the customer and his/her bank and the reporting message used, the information may be displayed differently in the account statement message (camt.053) and a detailed entry report in the notification message (camt.054).

### 3.2 NCT Inst DS-02 attributes and the corresponding elements in the “TransactionDetails” section of the relevant camt messages

The description below applies when the customer (i.e. beneficiary) wishes to receive the detailed information of a transaction under “Entry Details”. Depending on the agreement between the customer and his/her bank and the reporting message used, the information may be displayed differently in the account statement message (camt.053) and a detailed entry report in the notification message (camt.054).

### 3.3 “TransactionDetails” section of the ‘camt’ messages populated with the DS-02 attributes

The description below applies when the customer (i.e. beneficiary) wishes to receive the detailed information of a transaction under “Entry Details”. Depending on the agreement between the customer and his/her bank and the reporting message used, the information may be displayed differently in the account statement message (camt.053) and a detailed entry report in the notification message (camt.054).

The three considered camt messages are structured as follows:

Camt.052	Camt.053	Camt.054
Index 1.0 + GroupHeader	Index 1.0 + GroupHeader	Index 1.0 + GroupHeader
Index 2.0 + Report	Index 2.0 + Statement	Index 2.0 + Notification
Index 2.76 ++ Entry	Index 2.76 ++ Entry	Index 2.56 ++ Entry
Index 2.135 +++ EntryDetails	Index 2.135 +++ EntryDetails	Index 2.115 +++ EntryDetails
Index 2.142 ++++ TransactionDetails	Index 2.142 ++++ TransactionDetails	Index 2.122 ++++ TransactionDetails

The description below applies to the TransactionDetails section of the messages. Only the elements immediately below TransactionsDetails (i.e. elements tagged with 5 ‘+’) are all mentioned. Under such elements, only those reflecting DS Attributes are expanded with sub-elements if any.
