NPC CREDIT TRANSFER SCHEME CUSTOMER-TO-PSP RECOMMENDED IMPLEMENTATION GUIDELINES

NPC003-01 / 2023 Version 1.0 / Date issued: 11 July 2022 / Date effective: 1 May 2023

Public

Abstract

This document sets out the recommended rules for implementing the 2023 NPC Credit Transfer Scheme Rulebook based on version 2019 of the customer-to-PSP credit transfer ISO 20022 XML message standards.

Issue number	Dated	Reason for revision
2020 v.1.0	2020-03-27	Decided by NPC Scheme Management Committee (SMC) 26 Mars 2020.
2020 v. 1.0.1	2020-09-09	Updates suggested by NCT & NCT Inst WG and decided by the NPC Scheme Management Committee (SMC) 10 June 2020. All changes listed in in chapter 3.
2020 v. 1.1	2021-04-30	Update agreed by NCT & NCT Inst WG and decided by Scheme Management Committee (SMC) 13 April 2021.
2023 v.1.0	2022-07-11	Updates suggested by NCT & NCT Inst WG and decided by the NPC Scheme Management Committee (SMC) 8 June 2022. All changes listed in in chapter 3.

0.3 Purpose of Document

The objective of these Guidelines is to define the recommended rules to be applied to the ISO 20022 XML message standards for the implementation of the NPC Credit Transfers in the customer-to-Payment Service Provider (PSP) space.

Note: The term "bank" has been replaced by "PSP" in all the NPC payment scheme rulebooks and associated implementation guidelines to formally reflect the changes introduced by the Payment Services Directive (PSD) to the categories of institutions that can offer payment services, and the variety in PSP categories that are eligible to adhere to the NPC payment schemes. However, please note that in the context of ISO, the term "bank" is still used.

Note: The term 'Customer' is to be understood as 'Payment Service User' (PSU), meaning a natural or legal person making use of a payment service in the capacity of payer, payee, or both. Such person can take up the role of Originator and/or Beneficiary under the Scheme.

1. Introduction

This document sets out the NPC recommended rules for implementing the credit transfer ISO 20022 XML initiation message standards. The NPC Credit Transfer Scheme Rulebook defines data sets which are implemented in the relevant ISO 20022 XML message standard of which the following are covered:

NPC Credit Transfer Scheme Rulebook	ISO 20022 XML Message Standards
DS-01 *Customer-to-PSP Credit Transfer Information*	Customer Credit Transfer Initiation (pain.001.001.09)
DS-04 *PSP-to-Customer Credit Transfer Information*	Statements/advice ISO 20022 XML standards are covered separately.
Reject, Negative or Positive response based on DS-03 for the PSP-to-Customer reject.	Customer Payment Status Report (pain.002.001.10)

The Guidelines for the customer-to-PSP and PSP-to-customer XML message standards are a recommendation from the NPC on how to support the XML message standards at the request of the Originator or Beneficiary. This means that a Scheme Participant is recommended to accept the messages as described in these guidelines.

1.1 Coverage of the NPC customer-to-PSP Implementation Guidelines

The purpose of the NPC customer-to-PSP Implementation Guidelines, hereafter referred to as the Guidelines, is to provide guidance on the use of the payment initiation ISO 20022 XML standards (the 'pain' messages) in initiating NPC core payments as defined in the NPC scheme rulebooks and supplemented by processing requirements.

The Guidelines are fully aligned to the NPC core requirements when defined in the Rulebook and identify message elements needed for initiating NPC payments while recognizing message elements that may be available for use in Additional Optional Services (AOS), as shown below.

Figure 1

Global ISO 20022 XML Message Standards			
Message elements from the ISO messages corresponding to Rulebook requirements	**Message elements that are mandatory in the ISO messages or needed for Processing**	**Message elements from the ISO messages available for use by AOS within an NPC Governance framework**	**Message elements from ISO messages not applicable to NPC**
NPC Implementation Guidelines for NPC Core subset, identifying elements - **to be used as defined in ISO** - **to be used with NPC usage rules (from or completing the Rulebook)** **Note: yellow fields can be used in a specific way for an AOS.**		**To be developed and documented by AOS Communities**	**Not available for use in NPC payments**
NPC Payments			

These Guidelines define the NPC Core Mandatory Subset[2] of the Global ISO 20022 XML standard that consists of message elements:

- required in the Rulebook as business requirements

- needed for processing by PSPs, clearing and settlement mechanisms and PSP customers

Elements needed for specific national regulatory requirements are not considered in these guidelines. They have to be dealt with at national level without being regarded as an AOS.

These message elements define the **NPC core service** and are denoted by yellow shading in the message structures given in the following chapters. Only these elements are further detailed with relevant NPC core requirements, such as the use of the message element, its components or the values that must be used. Usage rules, for example, may indicate limits on the number of repetitions, or code value restrictions, while format rules may be used to indicate the allowable combinations of components of a message element.

These Guidelines also recognise message elements and the usage rules in the ISO 20022 XML standard that may be available for use in an AOS, subject to a governance framework to be defined by the NPC. The definition and documentation of these message elements are a matter for the AOS communities involved. These message elements are denoted by white shading.

Where there are message elements that do not apply to NPC payments, these are denoted with red shading in the right-most column of the message structures. To date, few such message elements have been identified.

1.2 Use of these Guidelines by the instructing and instructed parties[3]

- NPC core payments are executed using messages only containing message elements defined as part of the NPC Core Subset (shaded yellow in Figure 2).

- Payments that include message elements that are defined and documented by AOS communities (shaded white/yellow in Figure 2) are considered as NPC payments, but not as NPC core payments.

---

[2] The NPC Core Mandatory Subset is hereafter known as the NPC core service.
[3] Instructing and instructed parties include CSMs.

- It is the responsibility of the instructing customer and instructed PSP of the message to ensure that message elements defined for use in an AOS are only included in messages sent to AOS community members.

- The instructed PSP receiving a message containing AOS message elements, but which is not a member of this AOS community, may ignore the information, that is, not use it for processing, nor forward it to the next party in the chain. The instructed PSP, however, may reject the message for this reason.

1.3 Notation Conventions

The Guidelines are presented in a similar format than the one used in the ISO 20022 XML standard.

#	NPC Mul	Message Element	NPC Core Requirements
1.00	1..1	Message root +Group Header ++Sublevel 1 +++Sublevel 2	*NPC Usage Rule(s)* *(e.g., Mandatory)* *NPC Format Rule(s)* **ISO Name** **ISO Definition** **XML Tag** **Type** (Yellow: Message Element that is part of the NPC Core Service)
	1..1		**XML Tag** xs:choice
1.01	1..1	Message root +Group Header ++Sublevel 1 +++Sublevel 2 ++++Sublevel 3	*NPC Rulebook* *(Attribute used in Rulebook)* *NPC Usage Rule(s)* (e.g., Only 'NPCA' is allowed.) **ISO Name** **ISO Definition** **XML Tag** **Type** **ISO Length** *NPC Length* (Yellow: Message Element that is part of the NPC Core Service)
			NPC Code restrictions
			NPCA *Nordic Paymnets Council Area Transfer, payments must be executed following the NPC Area Payment scheme.*
1.02	1..1	Message root +Group Header ++Sublevel 1 +++Sublevel 2 ++++Sublevel 3	**ISO Name** **ISO Definition** **XML Tag** **Type** (White: Message Element that is not part of the Core Service but is available for use in an NPC AOS)
1.0n	0..1	Message root +Group Header ++Sublevel 1	**ISO Name** **ISO Definition** **XML Tag** **Type** (Red: Message Element that is not to be used in NPC Payments)

Figure 2

Where:

- Column 1 indicates the message element Index number specific to these Implementation Guidelines. As a result, the Index numbers differ from the ones used in the relating ISO 20022 Message Definition Report, PDF version.

- Components of message elements that are not allowed in NPC payments or where no NPC requirements are defined are not displayed in full as the ISO 20022 XML standard applies.

- Column 2 indicates the mandatory or optional status and the number of repetitions defined by the NPC Core Requirements, e.g.:
  - 0..1 element is optional and may only be present once
  - 0..n element is optional with unlimited repetition
  - 1..1 element is mandatory and must be present exactly once
  - 1..n element is mandatory with unlimited repetition

The displayed NPC multiplicity may thus differ from the one of the ISO 20022 XML standards. When an element is shaded yellow, possible remaining ISO 20022 occurrences are available for use in an AOS.

Empty elements are not allowed (i.e., a message shall not contain elements without content).

- Column 3 indicates the full path of an element where the last line contains the name of the message element as defined in the ISO 20022 XML standard. When an element contains sub-elements, these are indented to the right and noted with a plus sign (+) per level.

- Column 4 specifies in italic characters the NPC Core Requirements as additional rules to those specified in the ISO 20022 XML standard, which are shown in non-italic characters.
  - When defined in the Rulebook, the attribute is indicated by the attribute name and where applicable, the number, i.e., AT-nn. Those message elements are shaded yellow.

  - When the message element relates to inter-PSP processing requirements, it is shaded yellow.

  - When the message element specified in the ISO 20022 XML standard is used for NPC payments without change (regarding the definition and any usage rules), no specific NPC Core requirements are provided and is shaded yellow.

  - When the message element is specified in the ISO 20022 XML standard as optional, but is mandatory in NPC Core requirements, this is specified as 'Mandatory' and is shaded yellow.

  - When the message element is not available for use in NPC payments, this is indicated with red shading. Note that these message elements are similarly not available for use in an AOS.

  - The NPC length is indicated for every message element (if applicable), even if it is the same length as in the ISO 20022 XML standard.

Column 4 may also indicate conditional relationships between components of a message element, for example, either component 1 or component 2 must be present, but not both (indicated, in empty lines without index number, in the column 4 with XML Tag 'xs:choice'). In such case, the choice is to be made between the two following sub-elements, if both are shaded yellow.

1.4 Character Set

The character set issue centres on the use of the full set characters in the message elements. Two considerations are:

- While PSPs and their customers must be allowed to use the character set currently in use at national level,

- PSPs and their customers cannot be required to support the full character set used in ISO 20022 XML messages.

Therefore:

- The ISO 20022 XML messages allow for the full range of global language requirements (UTF-8).

- PSPs and their customers must be able to support the Latin character set commonly used in international communication and in addition to this the Scandinavian characters and the @-sign, as follows:

  a b c d e f g h i j k l m n o p q r s t u v w x y z å ä ö æ ø
  A B C D E F G H I J K L M N O P Q R S T U V W X Y Z Å Ä Ö Æ Ø
  0 1 2 3 4 5 6 7 8 9
  / - ? : ( ) . , ' + @
  Space

- References, identifications, and identifiers must respect the following [8]:
  - Content is restricted to the Latin character set as defined above
  - Content must not start or end with a '/'
  - Content must not contain '//'s

Note: When a slash is used as delimiter between the attribute number (AT-XX) or code (ABCD) and the data content, no space is allowed directly after this slash.

However, there may be bilateral or multilateral agreements to support one or more sets of characters beyond the Latin character set including the Scandinavian characters and the @-sign referred to above.

1.5 General Message Element Specifications

1.5.1 BIC

The BIC used to identify financial institutions (Agents in the ISO 20022 XML standards) may be either BIC 11 or BIC 8.

1.5.2 Currency

Unlike the EPC SEPA Credit Transfer Rulebook, the NPC Credit Transfer Rulebook allows more than one currency. Currencies covered by the scheme are called 'Scheme Currencies' and are listed in the reference document *Scheme Currencies* [9].

1.5.3 Alias and Proxy

In the Nordic payment market it is common that an 'Alias' or 'Proxy' is used to identify an Originator's and/or a Beneficiary's account. Therefore, ISO 20022 elements in the Debtor Account and Creditor Account sections are utilized in order to enable (Originators) to initiate their payment from – and to - an 'Alias' or 'Proxy' instead of an IBAN, and for Beneficiaries to still be able to collect payments through an 'Alias' or 'Proxy' instead of their IBAN. NPC usage is described in the NPC Credit Transfer Scheme Inter-PSP Implementation Guideline in the Debtor Account and Creditor Account sections. For ease of use, National Account Number will be treated as an Alias, too. Attribute AT-11 Originator Proxy/Alias and AT-25 Beneficiary Proxy/Alias should be used.

1.5.4 Structured creditor references, e.g. OCR-references

In the Nordic payment market, there is a legacy in some countries to use existing national rules for creditor reference (i.e. OCR-references or Norwegian KID). These references are only used in combination with a corresponding 'Alias' or the National Account Number itself. The different national creditor rules have solutions for maintaining and performing necessary distribution of validation rules for the creditor reference. Therefore, when Originators have entered an OCR-reference or KID it is mandatory that the Originator PSP validates the 'structured creditor reference' by checking the rules for validation connected to the respective 'Alias' or National Account Number, to ensure the correctness of the OCR-reference or KID.

1.5.5 Extended remittance information, up to 999 occurrences of structured references

In the Nordic payment market it is a market practice to be able to enter remittance data with more than one occurrence of structured reference. Therefore, when using Extended Remittance Information, the Originator can refer to up to 999 invoices and credit notes in structured format to each Credit Transfer payment. It is recommended that all references have a referred document amount and it is recommended that the Originator PSP (Debtor PSP) ensures that the amount of the Credit Transfer equals the sum of the amounts of the referred references.

In comparison with EPC IGs, the NPC IGs do not use a specific attribute (AT-61 and AT-62 in EPC IGs) for the Extended remittance information. Instead the same attribute – AT-05 – is used for both payments with Extended Remittance Information and payments without.

The ERI-option supports the transmission and the processing of the following combination of RI in Credit Transfer Instructions and Transactions:

- One occurrence of 140 characters of unstructured RI and

- Up to 999 occurrences of 280 characters of structured RI based on the ISO 20022 standard or OCR-references described as above. The Originator can refer to up to 999 invoices and credit notes in structured format to each Credit Transfer payment. All references must also have a referred amount and be of the same currency.

When using more than one occurrence of the structured remittance information extended remittance information, ERI) both the structured and the unstructed reference must be used. In case of returns, rejects or similar R-messages only the unstructured remittance information sent by the Originator to the Beneficiary in the NPC Credit Transfer Instruction needs to be forwarded.

1.6 Implementation of ISO 20022 XML rules

This document should be read in conjunction with the ISO 20022 XML message standards.

2 Recommended Customer-to-PSP and PSP-to-Customer messages

2.1 Customer to PSP Credit Transfer Information (DS-01)

2.1.1 Use of the Customer Credit Transfer Initiation (pain.001.001.09)

The message is used to transport the customer-to-PSP Credit Transfer Information sent by the Originator to the Originator PSP.

The message caters for bulk and single payment instructions.

Note: In case the transaction is a transfer back related to an earlier executed NPC Credit Transfer (NCT) Transaction (as per 'Remarks' under DS-01 in the NCT rulebook), the 'purpose' element must be populated with 'RRCT' (Reimbursement Received Credit Transfer) or another code meaningful for identifying the NCT as a transfer back.

Note: In case the transaction is the result of a received Request-to-Pay (RTP) message, the 'Purpose' element must be populated with 'RRTP' (Related to a Request-to-Pay (RTP)). Further details on RTP are to be found in the SRTP documentation.

Note: In case AT-11 The Proxy/Alias of the account of the Originator or AT-25 The Proxy/Alias of the account of the Beneficiary is used, there are two options for how to state Proxy/Alias:

1. To state the Proxy/Alias under SchemeName as a Code or Proprietry Code. This is the only valid option for National Account Number/BBAN.
2. To state the Proxy/Alias under Proxy element as a Proprietary Code.

2.2 PSP to Customer Reject, Negative or Positive response Credit Transfer Dataset (based on DS-03)

Caution: These Guidelines are not sufficient to fully implement this message and require additional information under bilateral agreement between the customer and its PSP. The Rulebook in addition does not specify the dataset requirements.

2.2.1 Recommended Use of the Customer Payment Status Report (pain.002.001.10)

The CustomerPaymentStatusReport message pain.002 is used to provide information about the status, positive and/or negative on credit transfer instructions (pain.001) earlier sent. The message caters for bulk and single accept/reject instructions.

The CustomerPaymentStatusReport message includes status on either 'Group Status', 'Payment Information Status' or 'Transaction Status'. A reject status in pain.002, transported between the PSPs and their remitting customers, always includes a status reason code describing the reject reason.

Examples of status codes to be used for each level are provided in this document in section 2.2.2 Message Specifications.

Examples of status reason codes are provided in this document in section 2.2.3 Message Specifications.

Debtor Agent, upon reception of the pain.001, validates the message and produces status report(s) providing information about whether the payment instruction/transactions will be processed or not, i.e., if the file and/or the transactions in the file are rejected or accepted by the Debtor Agent.

There can be several status reports pain.002 produced for one credit transfer pain.001.

The CustomerStatusReport message refers to the original instruction(s) by means of references that links the transaction information in the pain.002 status report to the original pain.001:

pain.002	Link	pain.001

2.2.2 Message Element Specifications for status codes

The list below contains examples of ExternalPaymentGroupStatus1Code for "Group Status":

ISO Code	ISO Name	Description of Status Code
ACCP	AcceptedCustomerProfile	Preceding check of technical validation was successful. Customer profile check was also successful.
ACTC	AcceptedTechnical Validation	Authentication and syntactical and semantical validation are successful.
PART	PartiallyAccepted	A number of transactions have been accepted, whereas another number of transactions have not yet achieved.
RJCT	Rejected	Payment initiation or individual transaction included in the payment initiation has been rejected.

The list below contains examples of ExternalPaymentGroupStatus1Code for "Payment Information Status":

ISO Code	ISO Name	Description of Status Code
ACCP	AcceptedCustomerProfile	Preceding check of technical validation was successful. Customer profile check was also successful.
ACSP	AcceptedSettlement InProcess	All preceding checks such as technical validation and customer profile were successful and therefore the payment initiation has been accepted for execution.
ACWC	AcceptedWithChange	Instruction is accepted but a change will be made, such as date or remittance not sent.
PART	PartiallyAccepted	A number of transactions have been accepted, whereas another number of transactions have not yet achieved.
PDNG	Pending	Payment initiation or individual transaction included in the payment initiation is pending. Further checks and status update will be performed.
RJCT	Rejected	Payment initiation or individual transaction included in the payment initiation has been rejected.

The list below contains examples of ExternalPaymentTransactionStatus1Code for "Transaction Status":

ISO Code	ISO Name	Description of Status Code
ACCP	AcceptedCustomerProfile	Preceding check of technical validation was successful. Customer profile check was also successful.
ACSC	AcceptedSettlementCompletedDebitorAccount	Settlement on the debtor's account has been completed.
ACSP	AcceptedSettlementInProcess	All preceding checks such as technical validation and customer profile were successful and therefore the payment initiation has been accepted for execution.
ACWC	AcceptedWithChange	Instruction is accepted but a change will be made, such as date or remittance not sent.
PDNG	Pending	Payment initiation or individual transaction included in the payment initiation is pending. Further checks and status update will be performed.
RJCT	Rejected	Payment initiation or individual transaction included in the payment initiation has been rejected.

2.2.3 Message Element Specifications for reason codes

The list below contains examples of reason codes to be used when a pain.002 message is used for other purposes than accepted. In addition to the code, for further clarification, information can be provided as Additional Information.

For a full list of ISO 20022 ExternalStatusReason1Code, visit the external code list page at www.ISO20022.org.

ISO Code	ISO Name	Description of Reason Code
AC01	IncorrectAccountNumber	Account identifier incorrect (i.e., invalid IBAN)
AC02	InvalidDebtorAccountNumber	Debtor account number invalid or missing
AC03	Invalid Creditor Account Number	Creditor account number invalid or missing
AC04	ClosedAccountNumber	Account number specified has been closed on the bank of account's books.
AC05	ClosedDebtorAccountNumber	Debtor account number closed
AC07	ClosedCreditorAccountNumber	Creditor account number closed
AG02	InvalidBankOperationCode	Operation/transaction code incorrect, invalid file format *Usage Rule*: To be used for incorrect operation/transaction code.
AM03	NotAllowedCurrency	Specified message amount is a non-processable currency outside of existing agreement Usage Rule: To be used when Beneficiary PSP is not reachable in the specified currency.
AM04	Insufficient Funds	Amount of funds available to cover specified message amount is insufficient.
AM05	Duplication	Duplicate payment
AM11	InvalidTransactionCurrency	Transaction currency is invalid or missing Usage Rule: To be used when Beneficiary PSP is not reachable for cross border transactions.
CNOR	Creditor bank is not registered	Creditor PSP is not registered under this BIC in the CSM
DNOR	Debtor bank is not registered	Debtor PSP is not registered under this BIC in the CSM
ERIN	ERIOptionNotSupported	The Extended Remittance Information (ERI) option is not supported
FF01	InvalidFileFormat	Operation/transaction code incorrect, invalid file format *Usage Rule*: To be used for invalid file format.
MS03	NotSpecifiedReasonAgentGenerated	Reason not specified
RC01	BankIdentifierIncorrect	PSP identifier incorrect (i.e., invalid BIC)
RR01	MissingDebtorAccountOrIdentification	Regulatory Reason
RR02	MissingDebtorNameOrAddress	Regulatory Reason
RR03	MissingCreditorNameOrAddress	Regulatory Reason

ISO Code	ISO Name	Description of Reason Code
RR04	RegulatoryReason	Regulatory Reason
RR05	RegulatoryInformationInvalid	Regulatory or Central Bank Reporting information missing, incomplete or invalid.
RR09	InvalidStructuredCreditorReference	Proprietary code for structured creditor reference invalid or missing. Usage rule: To be used when structured reference is invalid or missing.
TM01	CutOffTime	File received after Cut-off Time

3 List of changes in NCT Customer-to-PSP Implementation Guidelines – Relative to 2020 v 1.1

(Note: This list is for information – the changes included in the body of the document are the changes in effect)

SYMBOLS USED

1. Column one contains the identification number of the Change

2. Column two contains the reference(s) to the relevant Index Number

3. Column three contains the reference(s) to the relevant section or message element

4. Column four contains a description of the change

5. Column five contains a status code:

    • REJ: Rejected by the NCT & NCT Inst WG

    • PEN: Issue pending in the NCT & NCT Inst WG

    • ACC: Accepted by the NCT & NCT Inst WG in Guidelines

6. Column six contains the type of change:

    • TYPO: Typing and layout errors

    • CLAR: Clarification of the text

    • CHAN: Change in or further alignment with the Rulebook content

3.1 List of changes 2023 v1.0 relative to 2020 v1.1

N°	#	Section / Message Element	Description	Status	Type
1.	General		'The term bank has been replaced by PSP'. Changes done throughout the document.	ACC	CHAN
2.	General		Migration to the 2019 version of the ISO 20022 messaging standard. Changes made throughout the document.	ACC	CHAN
3.	General		Charge Bearer codes SHAR and SLEV have been updated with new definitions for clarification, throughout the document.	ACC	CLAR
4.	General		Format rule for amount (Instructed Amount, Interbank Settlement Amount and Amount) added to be consistent.	ACC	CHAN
5.	General		Usage rule for Postal Address/Address Line word 'Component' is replaced by 'Sub-element'	ACC	CHAN
6.	0.3		Addition of Notes (term Bank/PSP and Customer).	ACC	CLAR
7.	1.0		Name of dataset DS-03 changed due to extended scope	ACC	CHAN
8.	1.4		"Including the Scandinavian characters as defined above" taken out under bullet point 5. New note added in last paragraph.	ACC	CHAN
9.	1.5.4		Additional information about Alias/Proxy for clarification.	ACC	CLAR
10.	2		Name of section changed to Recommended PSP to-PSP Messages. Replacement of the wording "BIC or BEI" by the wording "AnyBIC" in the Usage Rule throughout the document.	ACC	CHAN

N°	#	Section / Message Element	Description	Status	Type
			BIC has been replaced with BICFI throughout the document.		
11.	2.1.1		Three new notes added	ACC	CHAN
12.	2.1.1	1.5	NPC usage rule removed and multiplicity changed to 0..1	ACC	CHAN
13.	2.1.1	2.2	CHK added under NPC Code restrictions and NPC usage rule updated.	ACC	CHAN
14.	2.1.1	2.5	NPC Fract Digits changed to '2'	ACC	TYPO
15.	2.1.1	2.8	Usage rule for Service Level updated since ISO is unlimited	ACC	CHAN
16.	2.1.1	2.10	Proprietary element changed to white since only NPCA is allowed.	ACC	CHAN
17.	2.1.1	2.16	Proprietary added as white element for consistency reasons	ACC	CHAN
18.	2.1.1	2.18-2.19	Requested execution date added as yellow element and date time added as white element (ISO 2019)	ACC	CHAN
19.	2.1.1	2.23 2.29-2.32 2.35-2.36	Underlying elements for structured address added. Usage rule updated to clarify usage.	ACC	CHAN
20.	2.1.1	2.39	Usage rule updated to clarify usage.	ACC	CHAN
21.	2.1.1	2.41-2.49	Underlying element added for Organisation Identification including LEI as a white element (ISO 2019). Usage rule changed, removal of "one occurrence of other".	ACC	CHAN
22.	2.1.1	2.50-2.61	Underlying elements added for Private Identification	ACC	CHAN
23.	2.1.1	2.64-2.72	Changes made under Debtor account for Proxy/Alias to clarify usage. Name of AT-11 changed to align with EPC. Multiplicity changed to 1..1 for Scheme name code and proprietary. Issuer added as red element.	ACC	CHAN
24.	2.1.1	2.76-2.80	Proxy including underlying elements added as yellow elements.	ACC	CHAN
25.	2.1.1	2.82	Usage rule 'BICFI is recommended' added.	ACC	CHAN
26.	2.2.1	2.85	LEI added as white element (ISO 2019)	ACC	CHAN
27.	2.1.1	2.94	Instruction of Debtor Agent added as white element (ISO 2019)	ACC	CHAN
28.	2.1.1	2.96	Multiplicity changed to 1..1 for Ultimate Debtor Name. Usage rule added.	ACC	CHAN
29.	2.1.1	2.97	Usage rule added for Postal Address	ACC	CHAN
30.	2.2.1	2.99-2.100	Usage rule changed for Org Id and Private Id (removal of "one occurrence of other").	ACC	CHAN
31.	2.1.1	2.110	UETR added as white element (ISO 2019)	ACC	CHAN
32.	2.1.1	2.113	Usage rule for Service Level updated since ISO is unlimited	ACC	CHAN
33.	2.1.1	2.115	Proprietary element changed to white since only NPCA is allowed.	ACC	CHAN
34.	2.1.1	2.117	Addition of usage rule for 'PERI'	ACC	CHAN
35.	2.1.1	2.121	Proprietary added as yellow element for consistency reasons	ACC	CHAN
36.	2.1.1	2.127	Cheque instruction element changed from red to white	ACC	CHAN
37.	2.1.1	2.129	Multiplicity changed to 1..1 for Ultimate Debtor Name. Usage rule added.	ACC	CHAN
38.	2.1.1	2.130	Usage rule added for Postal Address	ACC	CHAN

N°	#	Section / Message Element	Description	Status	Type
39.	2.1.1	2.132-2.133	Usage rule changed for Org Id and Private Id	ACC	CHAN
40.	2.1.1	2.142, 2.144	NPC Rulebook referring to AT-23 moved from Creditor Agent to BICFI	ACC	CHAN
41.	2.1.1	2.145-2.149	NPC usage rule added and underlying elements added to clarify usage.	ACC	CHAN
42.	2.1.1	2.153 2.159-2.162 2.165-2.166	Underlying elements for structured address added. Usage rule updated to clarify usage.	ACC	CHAN
43.	2.1.1	2.169	Usage rule updated to clarify usage.	ACC	CHAN
44.	2.1.1	2.171-2.172	Usage rule changed for Org Id and Private Id	ACC	CHAN
45.	2.1.1	2.175-2.183	Changes made under Creditor account for Proxy/Alias to clarify usage. Name of AT-25 changed to align with EPC. Multiplicity changed to 1..1 for IBAN and Identification, Scheme name code and proprietary. Issuer added as red element.	ACC	CHAN
46.	2.1.1	2.184	Addition of white element to align with EPC.	ACC	CHAN
47.	2.1.1	2.185	Currency added as yellow element (ISO 2019)	ACC	CHAN
48.	2.1.1	2.186	Name added as white element for consistency reasons	ACC	CHAN
49.	2.1.1	2.187-2.191	Proxy including underlying elements added as yellow elements.	ACC	CHAN
50.	2.1.1	2.194	Usage rule updated under Postal Address to clarify usage.	ACC	CHAN
51.	2.1.1	2.196-2.197	Usage rule changed for Org Id and Private Id	ACC	CHAN
52.	2.1.1	2.202-2.203	Usage rule moved from Purpose to Code.	ACC	CHAN
53.	2.1.1	2.212	Multiplicity changed to 1..1	ACC	CHAN
54.	2.1.1	2.215	Addition of 'Proprietary' element shaded red for consistency reason.	ACC	CHAN
55.	2.1.1	2.217-2.218	Number and Related Date added as yellow elements	ACC	CHAN
56.	2.1.1	2.219-2.225	Addition of underlying elements for Referred Document Amount.	ACC	CHAN
57.	2.1.1	2.232	NPC usage rule under Reference changed to be correct and clarify usage for the Nordics.	ACC	CHAN
58.	2.1.1	2.235-2.236	Tax Remittance and Garnishment Remittance added as white elements (ISO 2019)	ACC	CHAN
59.	2.1.1	2.237	Additional Remittance Information changed to yellow	ACC	CHAN
60.	2.1.1	2.238, 3.0	Supplementary data added as white elements (ISO 2019)	ACC	CHAN
61.	2.2.1		Name of DS-03 changed due to extended scope	ACC	CHAN
62.	2.2.1	2.2.1	Initial text updated due to extended scope	ACC	CHAN

N°	#	Section / Message Element	Description	Status	Type
63.	2.2.1	1.3	NPC usage added and element changed to yellow	ACC	CHAN
64.	2.2.1	2.6	Usage rule updated and NPC code restrictions removed.	ACC	CHAN
65.	2.2.1	2.8	Usage rule 'mandatory' removed. Multiplicity changed to 0..1.	ACC	CHAN
66.	2.2.1	2.9	Multiplicity changed to 0..1	ACC	CHAN
67.	2.2.1	2.10	Message Specifications for reason code changed to 2.2.3	ACC	CHAN
68.	2.2.1	2.12	Additional Information changed to yellow	ACC	CHAN
