NPC INSTANT CREDIT TRANSFER SCHEME INTER-PSP IMPLEMENTATION GUIDELINES

NPC012-01 / 2023 Version 1.1 / Date issued: 6 December 2022 / Date effective: 19 November 2023

Public

Abstract

This document sets out the rules for implementing the 2023 NPC Instant Credit Transfer Scheme Rulebook based on version 2019 of the inter-PSP credit transfer ISO 20022 XML message standards.

2023 v.1.0	2022-07-11	Updates suggested by NCT & NCT Inst WG and decided by the NPC Scheme Management Committee (SMC) 8 June 2022. All changes listed in in chapter 3.
2023 v.1.1	2022-12-06	Updates suggested by NCT & NCT Inst WG and decided by the NPC Scheme Management Committee (SMC) 24 November 2022. All changes listed in in chapter 3.

0.3.   Purpose of Document

The objective of these Guidelines is to define the rules to be applied to the inter-Payment Service Provider (PSP) ISO 20022 XML message standards for the implementation of the NPC Instant Credit transfers (NPC Inst) as defined in the NPC Instant Credit Transfer Scheme Rulebook.

Note: In section 4.2.3. B of the NCT Inst Rulebook it is stated that "Participants are free to agree on a bilateral or multilateral basis with other Participants on a target maximum execution time of less than 10 seconds. This lower target maximum execution time only applies to those Participants that have concluded such agreement". In this context it is advised to use data elements 'Local Instrument', 'Category Purpose' or a combination of these data elements to uniquely identify transactions falling under such agreements.

Note: The term "bank" has been replaced by "PSP" in the NPC payment scheme rulebooks and associated implementation guidelines to formally reflect the changes introduced by the Payment Services Directive (PSD) to the categories of institutions that can offer payment services, and the variety in PSP categories that are eligible to adhere to the NPC payment schemes. However, please note that in the context of ISO, the term "bank" is still used.

Note: The term 'Customer' is to be understood as 'Payment Service User' (PSU), meaning a natural or legal person making use of a payment service in the capacity of payer, payee, or both. Such person can take up the role of Originator and/or Beneficiary under the Scheme.

1. Introduction

This document sets out the NPC rules for implementing the inter-PSP credit transfer ISO 20022 XML message standards. The NPC Instant Credit Transfer Scheme Rulebook defines data sets which are implemented in the relevant ISO 20022 XML message standard as follows:

NPC Instant Credit Transfer Scheme Rulebook	ISO 20022 XML Message Standards
DS-02 *Inter-PSP Payment Dataset*	FI to FI Customer Credit Transfer (pacs.008.001.08)
DS-03 *Confirmation Message*	Negative confirmation (RJCT) – FI to FI Payment Status Report (pacs.002.001.10)
	Positive confirmation (ACCP) – FI to FI Payment Status Report (pacs.002.001.10)
DS-05 *The Recall of an NCT Inst Dataset*	FI to FI Payment Cancellation Request (camt.056.001.08)
DS-06 *Response to a Recall of an NCT Inst Dataset*	Negative Response: Resolution of Investigation (camt.029.001.09)
	Positive Response: Payment Return (pacs.004.001.09)
DS-07 *Dataset for the NCT Inst Transaction status in-vestigation message sent by the Originator PSP*	FI To FI Payment Status Request (pacs.028.001.03)
DS-08 *Request for Recall by the Originator Dataset*	FI to FI Payment Cancellation Request (camt.056.001.08)
DS-09 *Response to the Request for Recall by the Originator Dataset*	Negative Response: Resolution of Investigation (camt.029.001.09)
	Positive Response: Payment Return (pacs.004.001.09)
Request for Status Update on a Request for Recall by the Originator (step 4C under 4.3.2.3)	FI To FI Payment Status Request (pacs.028.001.03)

The Guidelines for the inter-PSP credit transfer message standards are mandatory.

1.1. Coverage of the NPC Implementation Guidelines

The purpose of the NPC Implementation Guidelines, hereafter referred to as the Guidelines, is to provide guidance on the use of the Global ISO 20022 XML standards in making NPC core payments as defined in the NPC scheme rulebooks and supplemented by processing requirements.

The Guidelines are fully aligned to the NPC core requirements as defined in the Rulebook and identify message elements needed for inter-PSP processing while recognising message elements that may be available for use in Additional Optional Services (AOS), as shown below.

Global ISO 20022 XML Message Standards			
Message elements from the ISO messages corresponding to Rulebook requirements	**Message elements that are mandatory in the ISO messages or needed for Processing**	**Message elements from the ISO messages available for use by AOS within an NPC Governance framework**	**Message elements from ISO messages not applicable to NPC**
NPC Implementation Guidelines for NPC Core subset, identifying elements - **to be used as defined in ISO** - **to be used with NPC usage rules (from or completing the Rulebook)** **Note: yellow fields can be used in a specific way for an AOS.**		**To be developed and documented by AOS Communities**	**Not available for use in NPC payments**
NPC Payments			

Figure 1

These Guidelines define the NPC Core Mandatory Subset[2] of the Global ISO 20022 XML standard that consists of message elements:

- required in the Rulebook as business requirements
- needed for processing by PSPs and clearing and settlement mechanisms

These message elements define the **NPC core service** and are denoted by yellow shading in the message structures given in the following chapters. Only these elements are further detailed with relevant NPC core requirements, such as the use of the message element, its components or the values that must be used. Usage rules, for example, may indicate limits on the number of repetitions, or code value restrictions, while format rules may be used to indicate the allowable combinations of components of a message element.

These Guidelines also recognise message elements and the usage rules in the ISO 20022 XML standard that may be available for use in an AOS, subject to a governance framework to be defined by the NPC. The definition and documentation of these message elements are a matter for the AOS communities involved. These message elements are denoted by white shading.

Where there are message elements that do not apply to NPC payments, these are denoted with red shading in the right-most column of the message structures. To date, few such message elements have been identified.

1.2. Use of these Guidelines by the instructing and instructed parties[3]

- NPC core payments are executed using messages only containing message elements defined as part of the NPC Core Mandatory Subset (shaded yellow in Figure 2).
- Payments that include message elements that are defined and documented by AOS communities (shaded white/yellow in Figure 2) are considered as NPC payments, but not as NPC core payments.
- It is the responsibility of the instructing PSP of the message to ensure that message elements defined for use in an AOS are only included in messages sent to AOS community members.
- The instructed PSP receiving a message containing AOS-related message elements, but which is not a member of the AOS community, may ignore the information, that is, not use it for processing, nor forward it to the next party in the chain. The instructed PSP, however, may reject the message for this reason.

---

[2] The NPC Core Mandatory Subset is hereafter known as the NPC core service.
[3] Instructing and instructed parties include CSMs.

1.3.   Notation Conventions

The Guidelines are presented in a similar format than the one used in the ISO 20022 XML standard.

#	NPC Mul	Message Element	NPC Core Requirements	
1.00	1..1	Message root +Group Header ++Sublevel 1 +++Sublevel 2	*NPC Usage Rule(s)* *(e.g. Mandatory)* *NPC Format Rule(s)* **ISO Name** **ISO Definition** **XML Tag** **Type** (Yellow: Message Element that is part of the NPC Core Service)	
	1..1		**XML Tag** xs:choice	
1.01	1..1	Message root +Group Header ++Sublevel 1 +++Sublevel 2 ++++Sublevel 3	*NPC Rulebook* (*Attribute used in Rulebook*) *NPC Usage Rule(s)* (*e.g. Only 'NPCA' is allowed.*) **ISO Name** **ISO Definition** **XML Tag** **Type** **ISO Length** *NPC Length* (Yellow: Message Element that is part of the NPC Core Service)	
			NPC Code restrictions	
			NPCA *Nordic Payments Council Area Transfer, payments must be executed following the NPC Area Payment Scheme.*	
1.02	1..1	Message root +Group Header ++Sublevel 1 +++Sublevel 2 ++++Sublevel 3	**ISO Name** **ISO Definition** **XML Tag** **Type** (White: Message Element that is not part of the Core Service but is available for use in a NPC AOS)	
1.0n	0..1	Message root +Group Header ++Sublevel 1	**ISO Name** **ISO Definition** **XML Tag** **Type** (Red: Message Element that is not to be used in NPC Payments)	

Figure 2

Where:

- Column 1 indicates the message element Index number specific to these Implementation Guidelines and are similar to those used in EPC's SCT Inst Implementation Guidelines. As a result, the Index numbers differ from the ones used in the relating ISO 20022 Message Definition Report, PDF version.

- Components of message elements that are not allowed in NPC payments or where no NPC requirements are defined are not displayed in full as the ISO 20022 XML standard applies.

- Column 2 indicates the mandatory or optional status and the number of repetitions defined by the NPC Core Requirements, e.g.:

  o   0..1 element is optional and may only be present once
  o   0..n element is optional with unlimited repetition
  o   1..1 element is mandatory and must be present exactly once
  o   1..n element is mandatory with unlimited repetition

The displayed NPC multiplicity may thus differ from the one of the ISO 20022 XML standards. When an element is shaded yellow, possible remaining ISO 20022 occurrences are available for use in an AOS.

Empty elements are not allowed (i.e. a message shall not contain elements without content).

- Column 3 indicates the full path of an element where the last line contains the name of the message element as defined in the ISO 20022 XML standard. When an element contains sub-elements these are indented to the right and noted with a plus sign (+) per level.

- Column 4 specifies in italic characters the NPC Core Requirements as additional rules to those specified in the ISO 20022 XML standard, which are shown in non-italic characters.

  - When defined in the Rulebook, the attribute is indicated by the attribute name and where applicable, the number, i.e., AT-nn. Those message elements are shaded yellow.
  - When the message element relates to inter-PSP processing requirements, it is shaded yellow.
  - When the message element specified in the ISO 20022 XML standard is used for NPC payments without change (regarding the definition and any usage rules), no specific NPC Core requirements are provided and is shaded yellow.
  - When the message element is specified in the ISO 20022 XML standard as optional, but is mandatory in NPC Core requirements, this is specified as 'Mandatory' and is shaded yellow.
  - When the message element is not available for use in NPC payments, this is indicated with red shading. Note that these message elements are similarly not available for use in an AOS.
  - The NPC length is indicated for every message element (if applicable), even if it is the same length as in the ISO 20022 XML standard.

Column 4 may also indicate conditional relationships between components of a message element, for example, either component 1 or component 2 must be present, but not both (indicated, in empty lines without index number, in the column 4 with XML Tag 'xs:choice'). In such case, the choice is to be made between the two following sub-elements, if both are shaded yellow.

1.4.   Character Set

The character set issue centres on the use of the full set characters in the message elements. Two considerations are:

- PSPs must be allowed to use the character set currently in use at national level,

- PSPs cannot be required to support the full character set.

Therefore:

- The ISO 20022 XML messages allow for the full range of global language requirements (UTF-8).

- PSPs must be able to support the Latin character set commonly used in international communication and in addition to this, the Scandinavian characters and the @-sign, as follows:

  a b c d e f g h i j k l m n o p q r s t u v w x y z å ä ö æ ø
  A B C D E F G H I J K L M N O P Q R S T U V W X Y Z Å Ä Ö Æ Ø
  0 1 2 3 4 5 6 7 8 9
  / - ? : ( ) . , ' + @
  Space

- References, identifications and identifiers must respect the following [8]:

  - Content is restricted to the Latin character set as defined above
  - Content must not start or end with a '/'

      o   Content must not contain '//'s

Note: When a slash is used as delimiter between the attribute number (AT-XX) or code (ABCD) and the data content, no space is allowed directly after this slash.

However, there may be bilateral or multilateral agreements to support one or more sets of characters beyond the Latin character set including the Scandinavian characters and the @-sign referred to above.

1.5. General Message Element Specifications

1.5.1. BIC

The BIC used to identify financial institutions (Agents in the ISO 20022 XML standards) may be either BIC 11 or BIC 8.

Depending on the version of the ISO 20022 message used, the BIC of a financial institution may be populated either in a <BIC> or in a <BICFI> element (for the pacs.028 message).

1.5.2. Currency

Unlike the EPC SEPA Rulebook, the NPC Instant Credit Transfer Rulebook allows more than one currency. Currencies covered by the scheme are called 'Scheme currencies' and are listed in the reference document [9].

1.5.3. Alias or Proxy

In the Nordic payment market it is common that an 'Alias' or 'Proxy' is used to identify an Originator's and/or a Beneficiary's account. Therefore, ISO 20022 elements in the Debtor Account and Creditor Account sections are utilized in order to enable Originators to initiate their payment from – and to - an 'Alias' or 'Proxy' instead of an IBAN, and for Beneficiaries to still be able to collect payments through an 'Alias' or 'Proxy' instead of their IBAN. NPC usage is described in the NPC Credit Transfer Scheme Inter-PSP Implementation Guideline in the Debtor Account and Creditor Account sections. For ease of use, National Account Number will be treated as an Alias, too. Attribute AT-11 Originator Proxy/Alias and AT-25 Beneficiary Proxy/Alias should be used.

1.5.4. Structured creditor references, e.g., OCR-reference

In the Nordic payment market, there is a legacy in some countries to use existing national rules for creditor reference (i.e. OCR-references or Norwegian KID). These references are only used in combination with a corresponding 'Alias' or the National Account Number itself. The different national creditor rules have solutions for maintaining and performing necessary distribution of validation rules for the reference. Therefore, when Originators have entered an OCR-reference or KID it is mandatory that the Originator PSP validates the 'structured creditor reference' by checking the rule for validation connected to the respective 'Alias' or National Account Number, to ensure the correctness of the OCR-reference or KID.

1.6. Implementation of ISO 20022 XML rules

This document should be read in conjunction with the ISO 20022 XML message standards.

1.7. Change Over Date

As from the change-over date, receiving PSPs may only receive messages, including the r-messages, in the new version.

2. Mandatory PSP-to-PSP Messages

2.1. Inter-PSP Payment Dataset (DS-02)

2.1.1. Use of FI to FI Customer Credit Transfer (pacs.008.001.08)

The message is used to transport the Payment instruction from the Originator PSP to the Beneficiary PSP, directly or through intermediaries.

The message caters for single payment instructions only.

Note: The use of NPC Credit Transfer Inst is implied by element 'Local Instrument' being mandatory and 'Code' set to 'INST' (Instant Credit Transfer) only.

2.2. Negative or Positive Confirmation Message Dataset (DS-03)

2.2.1. Use of the FI to FI Payment Status Report (pacs.002.001.10)

The FI to FI PaymentStatusReport message pacs.002 caters for a single positive or negative confirmation instruction, e.g. reject or accept, on inter-PSP instant instructions earlier sent.

The status report includes status on either group level or transaction level. A reject status in pacs.002 always includes a status reason code describing the reject reason. The status reason codes used are described in ISO 20022 External Code Set, ExternalStatusReason1Code. Examples are provided in this document in section 2.2.2 Message Specification.

The Payment Status Report message refers to the original instruction by means of references that links the transaction information in the pacs.002 Payment Status Report to the original instruction (Instant Credit Transfer instruction pacs.008).
The confirmation message is used between both the CSM and the Beneficiary PSP and between the CSM and the Originator PSP.

Note: Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes."

Note: On "Group Status" the following codes are allowed:
- ACCP (AcceptedCustomerProfile)
- RJCT (Rejected)

Note: On "Transaction Status" the following codes are allowed:
- RJCT (rejected)

A. Negative confirmation message
When the code 'RJCT' is used in the 'Group Status' or 'Transaction Status', the message transports the negative confirmation between PSPs, directly or through intermediaries.

- Reason code 'TM01' (Invalid Cut-off Time) is the only reason code that can be used in a negative confirmation message from the CSM to the Beneficiary PSP.

- Reason code 'TM01' is not allowed in a negative confirmation message to the Originator PSP. Instead the code 'AB05' (Time-out Creditor Agent) or 'AB06' (Time-out Instructed Agent) can be used.

Note: Attribute AT-R1 'The type of "R"message' is implied by the 'Message Name', 'pacs.002.001.10', the 'Original Message Name Identification' set to 'pacs.008.001.08', 'Group Status' or 'Transaction Status' set to 'RJCT' and 'Payment Type Information' mentioning 'INST' (Transaction is related to an Instant Credit Transfer) under 'Local Instrument/Code'.

Note: Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes."

B. Positive confirmation message
When the code 'ACCP' (AcceptedCustomerProfile) is used in the 'Group Status', the message transports the positive confirmation between PSPs, directly or through intermediaries.

Note: The use case of the message is implied by the 'Name','pacs.002.001.10', the 'Original Message Name Identification' set to 'pacs.008.001.08', 'Group Status' set to 'ACCP' and 'Payment Type Information' mentioning 'INST' (Transaction is related to an Instant Credit Transfer) under 'Local Instrument/Code'.

2.2.2. Message Element Specifications

The list below contains examples of reason codes to be used when a pacs.002 message is used for other purposes than accepted (applies only to 'Transaction Information And Status').

For a full list of ISO 20022 rejection codes, ExternalStatusReason1Code, visit the external code list page at www.ISO20022.org.

ISO Code	ISO Name	NPC Core Reason as specified in the Rulebook
AB05	TimeoutCreditorAgent	Transaction stopped due to timeout at the Creditor Agent.
AB06	TimeoutInstructedAgent	Transaction stopped due to timeout at the Instructed Agent.
AB07	OfflineAgent	Agent of message is not online. Generic usage if it cannot be determined who exactly is not online.
AB08	OfflineCreditorAgent	Creditor Agent is not online.
AB09	ErrorCreditorAgent	Transaction stopped due to error at the Creditor Agent.
AB10	ErrorInstructedAgent	Transaction stopped due to error at the Instructed Agent.
AC01	IncorrectAccountNumber	Account identifier invalid (i.e. invalid IBAN or account number does not exist)
AC04	ClosedAccountNumber	Account closed
AC06	BlockedAccount	Account blocked, reason not specified
AG01	TransactionForbidden	Credit transfer forbidden on this type of account.
AG02	InvalidBankOperationCode	Operation/transaction code incorrect, invalid file format *Usage Rule*: To be used for incorrect 'operation/transaction' code.
AG09	PaymentNotReceived	Original payment never received.
AG10	AgentSuspended	Agent of message is suspended from the Real Time Payment system. Generic usage if it cannot be determined who exactly is suspended.
AG11	CreditorAgentSuspended	Creditor Agent of message is suspended from the Real Time Payment system.
AM02	NotAllowedAmount	Amount exceeds the maximum authorised amount for NPC Inst
AM03	NotAllowedCurrency	Specified message amount is a non-processable currency outside of existing agreement Usage Rule: To be used when Beneficiary PSP is not reachable in the specified currency.
AM05	Duplication	Duplicate payment
AM11	InvalidTransactionCurrency	Transaction currency is invalid or missing

ISO Code	ISO Name	NPC Core Reason as specified in the Rulebook
		Usage Rule: To be used when Beneficiary PSP is not reachable for cross border transactions.
AM23	AmountExceedsSettlementLimit	Transaction amount exceeds settlement limit.
BE04	MissingCreditorAddress	Account address is invalid
DS24	WaitingTimeExpired	Waiting time expired due to incomplete order
MD07	EndCustomerDeceased	Beneficiary deceased
MS02	NotSpecifiedReasonCustomerGenerated	By order of the Beneficiary
MS03	NotSpecifiedReasonAgentGenerated	Reason not specified
RC01	BankIdentifierIncorrect	PSP identifier incorrect, e.g. invalid BIC
RR01	MissingDebtorAccountOrIdentification	Regulatory Reason
RR02	MissingDebtorsNameOrAddress	Regulatory Reason
RR03	MissingCreditorsNameOrAddress	Regulatory Reason
RR04	RegulatoryReason	Regulatory Reason
RR09	InvalidStructuredCreditorReference	Proprietary code for structured creditor reference invalid or missing. *Usage rule*: To be used when structured reference is invalid or missing.
DNOR	Debtor bank is not registered	Originator PSP is not registered under this BIC in the CSM
CNOR	Creditor bank is not registered	Beneficiary PSP is not registered under this BIC in the CSM

Following code describes the only reason that can be used in a negative confirmation message to the Beneficiary PSP:

ISO Code	ISO Name	NPC Core Reason as specified in the Rulebook
TM01	InvalidCutOffTime	Time-out – maximum execution time has been exceeded

2.3.   Recall of an NCT Inst Dataset (DS-05)

2.3.1.   Use of FI-to-FI Payment Cancellation Request (camt.056.001.08)

The message is used to submit the request to cancel a pacs.008.001.08 or to cancel specified transactions from the Originator PSP to the next PSP in the chain or to the CSM, or from the CSM to the next PSP in the chain, where the following apply:

- Index 4.3 'Cancellation Identification' can only be populated with AT-R6 'The specific reference of the Originator PSP initiating the Recall'.

- Index 4.19 'Originator' can only be populated with AT-R2 'The Identification of the type of party initiating the "R"message'.

- Index 4.20 'Reason' is to be populated with AT-48 'The Recall reason code', where:

     o   Index 4.21 'Code' can only be populated with ISO code 'DUPL' (Duplicate payment), 'TECH' (Technical problem or 'FRAD' (Fraudulent origin)

- Index 4.23 'Additional Information' is allowed only when 'FRAD' is used as Recall reason code and in such case is to be populated with AT-49 'Additional Information to AT-48 The Recall reason code.

The message caters for single or group cancellation requests. Group cancellation requests allow recall of single or multiple transactions from single or multiple original messages.

Note: Attribute AT-R1 'The type of "R" message' is implied by the 'Message Name' set to 'camt.056.001.08', the 'Original Message Name Identification' set to 'pacs.008.001.08', 'Reason' set to 'DUPL', 'TECH' or 'FRAD'(under 'Code'), and 'Payment Type Information' mentioning 'INST' (Transaction is related to an Instant Credit Transfer) under 'Local Instrument/Code' .

Note: Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes.

		Document	**XML Tag**	Document
			Type	Document
	1..1	FITo FIPayment Cancellation Request V08	**ISO Name**	FITo FIPayment Cancellation Request V08
			ISO Definition	Scope The FIToFIPaymentCancellationRequest message is sent by a case creator/case assigner to a case assignee. This message is used to request the cancellation of an original payment instruction. The FIToFIPaymentCancellationRequest message is exchanged between the instructing agent and the instructed agent to request the cancellation of a interbank payment message previously sent (such as FIToFICustomerCreditTransfer, FIToFICustomerDirectDebit or FinancialInstitutionCreditTransfer). The FIToFIPaymentCancellationRequest message supports both the request for cancellation (the instructed agent - or assignee - has not yet processed and forwarded the payment instruction) as well as the request for refund (payment has been fully processed already by the instructed agent - or assignee).

2.3.2. Message Element Specifications

Reasons for a cancellation request are mapped to the ISO codes as follows:

ISO Code	ISO Name	NPC Core Reason as specified in the Rulebook
DUPL	Duplicate payment	Duplicate Sending
TECH	Technical Problem	Technical problems resulting in erroneous NPC Inst
FRAD	Fraudulent Origin	Fraudulent originated NCT Inst

2.4. Inter-PSP Negative Response to a Recall of an NCT Inst Dataset (DS-06)

2.4.1. Use of Resolution of Investigation (camt.029.001.09)

In the context of a Recall of an NPC Credit Transfer Inst, this message is to be used to transmit a negative response to a:

- Recall message (FI-to-FI Payment Cancellation Request, camt.056.001.08);

- Request for Status Update on a Recall message (FI-to-FI Payment Status Request, pacs.028.001.03, refer to section 'Request for Status Update on a Recall message below);

where the following apply:

- Index 3.0 'Status': only sub-element 'Confirmation' can be used, populated with 'RJCR' (Rejected Cancellation Request) only.

- Index 4.21 'Additional Information' under 'Cancellation Status Reason Information':

  - A mandatory occurrence starting with 'ATR6/' followed by the information as per attribute description 'The specific reference of the Originator PSP initiating the Recall'.

  - In addition:

    - if index 4.19 'Code' under 'Reason' is set to 'LEGL', two further occurrences are allowed to precise the reason and these must start with 'ATR5/', and/or

    - if 'Code' under 'Reason' was 'FRAD' (Fraudulent originated NCT Inst) in the camt.056.001.08 (DS-05), then up to ten further optional occurrences are allowed, all starting with 'FRAD/' followed by all information available to file a legal claim to recover the funds in case of reason code 'Fraudulent originated NCT Inst'.

  - As a consequence, the 'NPC Mult.' is set to [1..13].

The message caters for a single or group negative response.

Note: Attribute AT-R1 'The type of "R" message' is implied by the 'Message Name', 'camt.029.001.09', the 'Original Message Name Identification' set to 'pacs.008.001.08', 'Status' set to 'RJCR' and 'Payment Type Information' mentioning 'INST' (Transaction is related to an Instant Credit Transfer) under 'Local Instrument/Code'.

Note: Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes.

2.4.2.   Message Element Specifications

Reasons for the negative response to a Recall of an NCT Inst or to a Request for Status Update on a Recall of an NCT Inst are mapped to the ISO codes as follows:

Reasons for the negative response for use under 'Code':

ISO Code	ISO Name	NPC Core Reason as specified in the Rulebook
CUST	CustomerDecision	Beneficiary's Refusal
LEGL	LegalDecision	Legal reasons
ARDT	The transaction has already been re-turned	Already returned transaction
AC04	ClosedAccountNumber	Account closed
AM04	InsufficientFunds	Insufficient funds on the account
NOAS	NoAnswerFromCustomer	No response from Beneficiary
NOOR	NoOriginalTransactionReceived	Original Credit Transfer never received

2.5. Inter-PSP Positive Response to a Recall of an NCT Inst Dataset (DS-06)

2.5.1. Use of the Payment Return (pacs.004.001.09)

The positive response to a:

- Recall of an NCT Inst message (camt.056.001.08);

- Request for Status Update on a Recall of an NCT Inst (pacs.028.001.03, refer to section 'Request for Status Update on a Recall of an NCT Inst below);

is to be made using an inter-PSP return credit transfer message (pacs.004.001.09), where the following apply:

- Index 1.9 'Inter-PSP Settlement Date' to be populated with AT-R7 'The Settlement Date for the positive Response to the Recall'.

- Index 3.13 'Returned Inter-PSP Settlement Amount' to be populated with AT-46 'The returned amount of the positive response to the Recall in the relevant Scheme Currency and the relevant currency code'.

- Index 3.17 'Returned Instructed Amount' may be used.

- Index 3.22 'Amount' (under 'Charges Information') to be populated with AT-47 'The fee for the positive response to the Recall in the relevant Scheme Currency and the relevant currency code', if any.

- Index 3.24 'Financial Institution Identification' (under 'Party' under 'Charges Information') to be populated with AT-23 'The BIC code of the Beneficiary PSP'.

- Index 3.31 'Originator' to be populated with AT-R2 'The Identification of the type of party initiating the "R" message.

- Index 3.33 'Reason/Code' (under 'Return Reason Information') to be populated only with 'FOCR' (Following Cancellation Request).

- Index 3.35 'Additional Information' (under Return Reason Information) to be used with a mandatory occurrence starting with "AT-R6/" followed by the information as per attribute description 'The specific reference of the Originator PSP initiating the Recall'.

The message caters for a single or group positive response.

Note: Attribute AT-R1 is implied by the 'Message Name', 'pacs.004.001.09', the 'Original Message Name Identification' set to 'pacs.008.001.08', 'Reason' under 'Return Reason Information' set to 'FOCR' and 'Payment Type Information' mentioning 'INST' (Transaction is related to an Instant Credit Transfer) under 'Local Instrument/Code'.

Note: Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes.

2.6. Request for Status Update on a Recall of an NCT Inst Transaction

2.6.1. Use of FI To FI Payment Status Request (pacs.028.001.03)

This message is optional and is sent to the Beneficiary PSP in case the Originator PSP did not receive an response to a Recall of an NPC Inst, where the following applies:

- Index 3.3 'Original Instruction Identification' must be populated with the 'Cancellation Identification' (AT-53) of the related camt.056 transaction information.

In an NCT Inst context, the message is used for a single or group status request.

Note: The use case of the message is implied by the 'Message Name','pacs.028.001.03', the 'Original Message Name Identification' set to 'camt.056.001.08', the population of index 3.3 'Original Instruction Identification' and 'Payment Type Information' mentioning 'INST' (Transaction is related to an Instant Credit Transfer) under 'Local Instrument/Code'.

Note: Message elements under 'Original Transaction Reference' are based on DS-02 attributes.

2.8. Request for Recall by the Originator Dataset (DS-08)

2.8.1. Use of FI To FI Payment Cancellation Request (camt.056.001.08)

The message is used to submit the request made by the Originator to cancel a pacs.008.001.08 for other reasons than those allowed in a Recall of an NCT Inst (refer to section 'Recall of an NCT Inst Dataset' above). As a consequence, the following apply:

- Index 4.3 'Cancellation Identification' can only be populated with AT-53 'The specific reference of the Originator PSP for the Request for Recall by the Originator'.

- Index 4.19 'Originator' can only be populated with AT-02 'The name of the Originator'.

- Index 4.20 'Reason' is to be populated with AT-52 'Reason code for the Request for Recall by the Originator', where:

  - Index 4.21 'Code' can only be populated with ISO code 'CUST' (Requested By Customer), 'AM09' (Wrong Amount) or 'AC03' (Wrong IBAN).

- Index 4.23 'Additional Information' is to be populated with AT-54 'Additional Information to AT-52 Reason code for the Request for Recall by the Originator' which can be used in accordance with above reason codes.

The message caters for single or group cancellation requests.

Note: The use case of the message is implied by the 'Message Name', 'camt.056.001.08', the 'Original Message Name Identification' set to 'pacs.008.001.08', 'Originator' set to AT-02 'The name of the Originator', 'Reason' set to 'CUST', 'AM09' or 'AC03' (under 'Code'), and 'Payment Type Information' mentioning 'INST' (Transaction is related to an Instant Credit Transfer) under 'Local Instrument/Code'

Note: Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes.

		Document	**XML Tag** **Type**	Document Document	
	1..1	FITo FIPayment Cancellation Request V08	**ISO Name** **ISO Definition**	FITo FIPayment Cancellation Request V08 Scope The FIToFIPaymentCancellationRequest message is sent by a case creator/case assigner to a case assignee. This message is used to request the cancellation of an original payment instruction. The FIToFIPaymentCancellationRequest message is exchanged between the instructing agent and the instructed agent to request the cancellation of a interbank payment message previously sent (such as FIToFICustomerCreditTransfer, FIToFICustomerDirectDebit or FinancialInstitutionCreditTransfer). The FIToFIPaymentCancellationRequest message supports both the request for cancellation (the instructed agent - or assignee - has not yet processed and forwarded the payment instruction) as well as the request for refund (payment has been fully processed already by the instructed agent - or assignee).

2.8.2. Message Element Specifications

Reasons for a Request for Recall by the Originator are mapped to the ISO codes as follows:

ISO Code	ISO Name	NPC Core Reason as specified in the Rulebook
CUST	Requested by Customer	By request of the Originator without any reason specified
AM09	Wrong Amount	Wrong Amount
AC03	Invalid Creditor Account Number	Wrong unique identifier of the Beneficiary account

2.9. Inter-PSP Negative Response to the Request for Recall by the Originator Dataset (DS-09)

2.9.1. Use of Resolution of Investigation (camt.029.001.09)

The pacs.004.001.09 message used for an inter-PSP positive response to a Recall (see chapter 2.6 above) can be reused for:

- an inter-PSP positive response to the Request for Recall by the Originator.

- an inter-PSP positive response to a Request for Status Update on a Request for Recall by the Originator (refer to 2.11 below).

In the context of a Request for Recall by the Originator of an NPC Inst, this message is to be used to transmit a negative response to a:

- Request for Recall by the Originator message (FI-to-FI Payment Cancellation Request V01, camt.056.001.08);

- a Request for Status Update on a Request for Recall by the Originator message (FI-to-FI Payment Status Request, pacs.028.001.03, refer to section 'Request for Status Update on a Request for Recall by the Originator' below);

where the following apply:

- Index 3.0 'Status': only sub-element 'Confirmation' can be used, populated with 'RJCR' (Rejected Cancellation Request).

- Index 4.21 'Additional Information':

  o A mandatory occurrence starting with 'AT53/' followed by the information as per attribute description 'The specific reference of the Originator PSP for the Request for Recall by the Originator'.

  o In addition, when reason code was 'AC03' (Wrong IBAN) in the camt.056.001.08, up to ten occurrences are allowed all starting with 'AT59/' followed by the information as per attribute description 'Provision of all information available to file a legal claim to recover the funds in case of reason code 'wrong unique identifier of the Beneficiary account' (optional)'.

  o As a consequence, the 'NPC Mult.' is set to [1..11].

The message caters for a single or group negative response.

Note: The use case of the message is implied by the 'Message Name', 'camt.029.001.09', the 'Original Message Name Identification' set to 'pacs.008.001.08', 'Status' set to 'RJCR' and 'Payment Type Information' mentioning 'INST' (Transaction is related to an Instant Credit Transfer) under 'Local Instrument/Code'.

Note: Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes.

2.9.2. Message Element Specifications

Reasons for the negative response to the Request for Recall by the Originator as per AT-57 are mapped to the ISO codes as follows.

Reasons for the negative response for use under 'Code':

ISO Code	ISO Name	NPC Core Reason as specified in the Rulebook
CUST	CustomerDecision	Beneficiary's Refusal
LEGL	LegalDecision	Legal reasons
ARDT	The transaction has already been returned	Already returned transaction
AC04	ClosedAccountNumber	Account closed
AM04	InsufficientFunds	Insufficient funds on the account
NOAS	NoAnswerFromCustomer	No response from Beneficiary
NOOR	NoOriginalTransactionReceived	Initial NPC

2.10. Inter-PSP Positive Response to the Request for Recall by the Originator (DS-09)

2.10.1. Use of inter-PSP return credit transfer message (pacs.004.001.09)

The pacs.028.001.003 message used for an NCT Inst Investigation message can be reused for a Request for Status Update on a Request for Recall by the Originator, where the following applies:

In the context of a Request for Recall by the Originator of an NPC Inst, this message is to be used to transmit a positive response to a:

- Request for Recall by the Originator message (FI-to-FI Payment Cancellation Request V01, camt.056.001.08)

- Request for Status Update of a Request for Recall by the Originator message (FI- to-FI Payment Status Request, pacs.028.001.03, refer to section 'Request for Status Update on a Request for Recall by the Originator' below)

where the following applies:

- Index 1.9 'Inter-PSP Settlement Date' to be populated with AT-56 'The settlement date for the positive response to the Request for Recall by the Originator'.

- Index 3.13 'Returned Inter-PSP Settlement Amount' to be populated with AT-55 'The returned amount of the positive response to the Request for Recall by the Originator in the relevant Scheme Currency and the relevant currency code'.

- Index 3.17 'Returned Instructed Amount' may be used.

- Index 3.22 'Amount' (under 'Charges Information') to be populated with AT-58 'Fee for the positive response to the Request for Recall by the Originator in the relevant Scheme Currency and the relevant currency code', if any.

- Index 3.24 'Financial Institution Identification' (under 'Party' under 'Charges Information') to be populated with AT-23 'The BIC code of the Beneficiary PSP'.

- Index 3.31 'Originator' to be populated with AT-R2 'The Identification of the type of party initiating the "R"message'.

- Index 3.33 'Reason/Code' (under Return Reason Information) to be populated only with 'FOCR' (Following Cancellation Request).

- Index 3.35 'Additional Information' under 'Return Reason Information' to be used with a mandatory occurrence starting with 'AT53/' followed by the information as per attribute description 'The specific reference of the Originator PSP for the Request for Recall by the Originator'.

The message caters for a single or group positive response.

Note: Attribute AT-R1 'The type of R-message'is implied by the 'Message Name', 'pacs.004.001.09', the 'Original Message Name Identification' set to 'pacs.008.001.08', 'Reason' under 'Return Reason Information' set to 'FOCR' and 'Payment Type Information' mentioning 'INST' (Transaction is related to an Instant Credit Transfer) under 'Local Instrument/Code'.

Note: Message elements under 'Original Transaction Reference' sequence are based on DS-02 attributes.

2.11. Request for Status Update on a Request for Recall by the Originator

2.11.1. Use of FI To FI Payment Status Request (pacs.028.001.03)

This message is sent to the Beneficiary PSP in case the Originator PSP did not receive an response to a Request for Recall by the Originator, where the following applies:

- Index 3.3 'Original Instruction Identification' must be populated with a cancellation ID (AT-53) of the related camt.056 Transaction Information.

In an NCT Inst context, the message is used for a single or group status request.

Note: The use case of the message is implied by the 'Message Name', 'pacs.028.001.03', the 'Original Message Name Identification' set to 'camt.056.001.08', the population of index 3.3 'Original Instruction Identification' and 'Payment Type Information' mentioning 'INST' (Transaction is related to an Instant Credit Transfer) under 'Local Instrument/Code'.

Note: Message elements under 'Original Transaction Reference' are based on DS-02 attributes.

3. List of changes in the NPC Inst Credit Transfer Implementation Guidelines 2023 version 1.1 – Relative to the 2023 version 1.0 and the 2021 v 1.1

(Note: This list is for information – the changes included in the body of the document are the changes in effect)

SYMBOLS USED

1. Column one contains the identification number of the Change
2. Column two contains the reference(s) to the relevant Index Number
3. Column three contains the reference(s) to the relevant section or message element
4. Column four contains a description of the change
5. Column five contains a status code:
   - REJ: Rejected by the NCT & NCT Inst WG
   - PEN: Issue pending in the NCT & NCT Inst WG
   - ACC: Accepted by the NCT & NCT Inst WG in Guidelines
6. Column six contains the type of change:
   - TYPO: Typing and layout errors
   - CLAR: Clarification of the text
   - CHAN: Change in or further alignment with the Rulebook content
